## Lecture for Today

---

- What is clustering?
- K-Means
- Gaussian Mixture Models

# Clustering

---

**Classification:** what is label of new point?

**Clustering:** how should we group these points?

**Clustering:** or is this the right grouping?

**Clustering:** what about this?

## Clustering

### Uses:

- genomics
- medical imaging
- social network analysis
- recommender systems
- market segmentation
- voter analysis

## Voter Analysis

- soccer moms (female, middle aged, married, middle income, white, kids, suburban)
- Nascar dads (male, middle aged, married, middle income, white, kids, Southern, suburban or rural)
- security moms ( ... )
- low information voters
- Ivy League Elites
